

CONSTRUCTION UPDATES & ACTIVITIES

Week Ending of October 21, 2016

San Luis Obispo Instructional Building Project

Work this week: Approximately 90% of the structural steel is on site and has been erected. The newly installed steel is in the process of being plumbed, lined, bolted, and welded. This work will continue for next several weeks, as well as the steel decking installation on the second floor and roof.

Access:	No access into fenced construction area
Noise:	Moderate noise and vibration from equipment operation
Parking:	Some parking loss in Lot 10 for the duration of the project
Utilities:	None
Odors:	None
Dust:	Minor dust impact.
