

CONSTRUCTION UPDATES & ACTIVITIES

Week Ending December 2, 2016

North County Campus Center Project

Work this week: The structural steel erector continues to weld structural steel beam connections. The installation of the metal decking continues at the second floor and roof deck. The concrete contractor continues installing reinforcing at the grade beams and the elevator pit slab, and is placing concrete as sections are complete. The site utility work continues and includes testing and backfill of the gas, fire and domestic water lines, as well as the installation of the storm drain system piping towards the south.

Access:	No access into fenced construction area
Noise:	Moderate noise from structural steel and metal deck equipment and installation operations.
Parking:	Some parking loss in Lot 10 for the duration of the project
Utilities:	None
Odors:	None
Dust:	Minor dust impact
