

CONSTRUCTION UPDATES & ACTIVITIES

*Week Ending June 17, 2016***San Luis Obispo Instructional Building Project**

Work this week: Concrete was poured for the elevator pit walls this week. Contractors installing steel reinforcement for the footings and grade beams continue to make progress. Additionally, the electrical contractor has completed the installation of the underground conduit. As shown below, new steel plates were placed at the entrance of the construction site in order to protect the existing sidewalk.

Access:	No access to construction site
Noise:	Loud equipment noise
Parking:	Some permanent parking loss
Utilities:	None
Odors:	None
Dust:	Minor dust impact
Vibrations:	Minor vibrations
